IT Custom Solution.

IT Custom Solution LLC Receives National NMSDC MBE Certification

Originally published 8 July 2026. Company information reviewed 9 September 2026. The certification was issued 18 June 2026; the announcement date has not changed.

New York, NY. July 8, 2026. IT Custom Solution LLC announced its Minority Business Enterprise certification through the New York and New Jersey Minority Supplier Development Council, an NMSDC affiliate. Certificate NY100001102 was issued on June 18, 2026 and is valid through June 30, 2027.

“Certification is useful only when it connects to work a buyer can actually source,” said Olufela “Lu” Fagbure, Founder and Director of IT Custom Solution LLC. “For us, that means showing up with clear services, clean facts, and the discipline to say exactly where we can help.”

ITC’s practices span pursuit and teaming, consulting and AI advisory, technology services, and software development. As of the October product-portfolio update, its software portfolio brings distinct focus to three fields: Winrove for government contracting, OpsTicket for skills and assessment-led recruiting, and ClaimKeel for healthcare revenue-cycle management, in development.

NMSDC certification supports participation in supplier-diversity programs that recognize the credential. Each buyer determines its qualification, registration and sourcing requirements; certification does not guarantee a contract award.

About IT Custom Solution

IT Custom Solution LLC is a founder-owned technology firm established in 2021 and based in New York. Its work spans pursuit and teaming, consulting and AI advisory, technology services, and software products including Winrove and OpsTicket. ITC holds NYC MBE and NMSDC MBE certifications. Its federal registration identifies the company by UEI PR9KWJPM4JU9 and CAGE 91CE1.

Source reconciliation: 1 October 2026. SAM registration and SBA 8(a) application status reconciled from the latest documented records. This is not a same-day registry check, new certification issuance or a new review of the original announcement. Product framing updated 10 October 2026 to the three-brand portfolio: Winrove, OpsTicket and ClaimKeel (in development).
